

DISCLOSURE REGARDING PROGRAM PREPARATION FOR PROFESSIONAL LICENSURE OR CERTIFICATION

COLLEGE	Community Innovation and Education
PROGRAM	Autism Spectrum Disorders, Graduate Certificate

The University of Central Florida is committed to providing clear and accurate information to current and prospective students to help inform career planning. The UCF program identified above prepares students for state-regulated professional certification or endorsement. However, specific certification or endorsement requirements may vary by state or territory. Requirements typically include earning a degree or other educational credential from an institution and program that meet certain requirements in that state (e.g., specific coursework, accredited status); passing a state or national exam; and/or working in the field for a period of time or completing a certain number of clinical hours. If your career plans include pursuing professional certification or endorsement, it is important to become educated on the credentialing requirements of the state in which you intend to practice.

Effective July 1, 2024, federal regulation requires the university to meet all educational requirements for state-regulated licensure or certification in every US state and territory where its eligible programs are offered. This disclosure is intended to provide you with information regarding the educational preparation you will receive in your chosen program of studyⁱ.

UCF Program Preparation in the State of Florida

The Autism Spectrum Disorders (Graduate Certificate) program meets the educational requirements for certification in the Autism Spectrum Disorders Endorsement in the State of Florida. Individuals with a bachelor's or higher degree with certification in any exceptional student education area are eligible to add the Autism Spectrum Disorders endorsement to their Florida professional teaching certificate. For information on all requirements for this credentialⁱⁱ, please review the Florida Department of Education certification requirements available here: <https://www.fldoe.org/teaching/certification/>.

UCF Program Preparation in Other US States and Territoriesⁱⁱⁱ

As a participant in the State Authorization Reciprocity Agreements (SARA), UCF is authorized to offer educational programs in all states (except California), the District of Columbia, Puerto Rico, and the US Virgin Islands. The State of California is not currently a member of SARA, but UCF is separately authorized to offer educational programming there as well.

We have not determined whether or not the Autism Spectrum Disorders (Graduate Certificate) program meets the educational requirements for graduates to be eligible to apply for certification or endorsement in any additional states.

If you are interested in seeking certification or endorsement outside of the State of Florida, we encourage you to review the appropriate state board of education information to determine all requirements needed to obtain your credential of interest. State board of education contact information for this field can be found here: <https://apq.ucf.edu/document/statelicensingboards-teachered>. You are also welcome to reach out to the UCF program contact identified below with questions in this regard, and we will do our best to assist you in your career planning.

Enrollment Eligibility Restrictions^{iv}

To comply with federal enrollment restrictions, UCF may only enroll students physically located in the states and territories where it meets all educational requirements for the credential it prepares students to achieve. Accordingly, we are generally unable to enroll students physically located in other states and territories during their first term of enrollment in the program unless they intend to pursue licensure in a state or territory where UCF does meet educational eligibility requirements and submit a written attestation to this effect. Please reach out to the program contact listed below for additional guidance in this regard.

UCF Program Preparation Outside the United States

This disclosure does not address program eligibility in countries outside the United States. We have not determined whether or not the Autism Spectrum Disorders (Graduate Certificate) program meets the educational requirements for graduates to be eligible to apply for certification or endorsement outside the United States. It is important to become educated on the credentialing requirements in the location in which you intend to practice.
