| **COLLEGE** | **College of Community Innovation and Education** |
| **PROGRAM** | **Secondary Education BS** |
| **TRACK** | **Education Tracks** |

The University of Central Florida is committed to providing clear and accurate information to current and prospective students to help inform career planning. The UCF program identified above prepares students for state-regulated professional certification or endorsement. However, specific certification or endorsement requirements may vary by state or territory. Requirements typically include earning a degree or other educational credential from an institution and program that meet certain requirements in that state (e.g., specific coursework, accredited status), passing a state or national exam, and/or working in the field for a period of time or completing a certain number of clinical hours. If your career plans include pursuing professional certification or endorsement, it is important to become educated on the credentialing requirements of the state in which you intend to practice.

Effective July 1, 2024, federal regulation requires the university to meet all educational requirements for state-regulated licensure or certification in every U.S. state and territory where its eligible programs are offered. This disclosure is intended to provide you with information regarding the educational preparation you will receive in your chosen program of study.[1]

## UCF Program Preparation in the State of Florida

The Secondary Education (BS) Education Tracks meet the educational requirements for certification in the state of Florida as described below (the Lifelong Learning Tracks do not):

- English Language Arts Education with ESOL Endorsement Track: certification in English (Grades 6–12)
- Mathematics Education Track: certification in Mathematics (Grades 6–12)
- Science Education, Biology Track: certification in Biology (Grades 6–12)
- Science Education, Chemistry Track: certification in Chemistry (Grades 6–12)
- Science Education, Physics Track: certification in Physics (Grades 6–12)
- Social Science Education Track: certification in Social Science (Grades 6–12)

Graduates of these state-approved teacher preparation programs who have passed all three portions of the Florida Teacher Certification Examination (FTCE) will qualify for a Professional Educator's Certificate. For information on all requirements for this credential,[2] please review the Florida Department of Education requirements available here: https://www.fldoe.org/teaching/certification/.

## UCF Program Preparation in Other U.S. States and Territories[3]

We have not determined whether this program meets the educational requirements for graduates to be eligible to apply for certification or endorsement in any state other than Florida.

If you are interested in seeking certification or endorsement outside the state of Florida, we encourage you to review the appropriate state board of education information to determine all requirements needed to obtain your credential of interest. You are also welcome to reach out to the UCF program contact identified below with questions in this regard, and we will do our best to assist you in your career planning.

## Enrollment Eligibility Restrictions[4]

To comply with federal enrollment restrictions, UCF may only enroll students physically located in the states and territories where it meets all educational requirements for the credential it prepares students to achieve. Accordingly, we are generally unable to enroll students physically located outside Florida during their first term of enrollment in the major unless they intend to pursue licensure in a state or territory where UCF does meet educational eligibility requirements and submit a written attestation to this effect. Otherwise, students physically located in an ineligible state during their first term of enrollment must select a major that is free from out-of-state enrollment restrictions. Please reach out to the program contact listed below for additional guidance in this regard.

## Programmatic Accreditation[5]

This program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP). Programmatic accreditation is typically required for state-regulated licensure in this field. Recognition by AAQEP is specific to the program and is distinct from UCF's institutional accreditation that is required for other purposes, including UCF's authorization to award federal financial aid to students.

## UCF Program Preparation Outside the United States

This disclosure does not address program eligibility in countries outside the United States. We have not determined whether this program meets the educational requirements for graduates to be eligible to apply for certification or endorsement outside the United States. It is important to become educated on the credentialing requirements in the location in which you intend to practice.
